

# APDFL version 15.0.4 now available

---

## New release enhances the user experience

Datalogics is pleased to announce the repackaged Adobe PDF Library 15. In it, we've made it easier to work with, simplified the folder structure, fixed several reported bugs, increased our documentation quality and enhanced our samples. These changes will improve the user experience and make it easier to work with the tools available.

The release includes the following changes:

### Product Structure

- Product structure was reorganized to facilitate easier product use
- Product size has been reduced by 20%
- DLI has been removed and is available only by request
- Added a resource folder for common utilities required by all versions of the Library

### Sample Repository

- Current samples have been consolidated and categorized
- New samples have been added based on customer feedback
- Sample descriptions have been updated to make them clear
- A new online sample repository has been created to help customers quickly examine the product functionality. They can download only the samples they need
- Links have been added from our detailed developer documentation to each sample

### Documentation

- Detailed getting started guides have been added to help customers get up and running with the product quickly
- A separate set of documentation is now available for all language interfaces
- Updates and enhancements have been added to the documentation to clarify different sections

This release is available to current customers via our ftp site - [ftp.datalogics.com](ftp:datalogics.com). If you are interested in evaluating our enhanced version of the Adobe PDF Library 15, please visit <http://www.datalogics.com/products/pdf/pdflibrary/eval/> to obtain an evaluation copy.
