

## DL Pager and CALS Tables

### DL Pager CALS Tables Format Set

DL Pager has been enhanced to handle CALS (Computer-Aided Logistics Support) Table markup. Datalogics CALS Tables Format Set is a set of formats which complement DL Pager, the premier electronic composition software product. The DL Pager CALS Tables Set enables the use of tables marked up using the CALS Table tag set to be used directly by DL Pager, without translation or manipulation of the tag set prior to composition. The DL Pager CALS Tables Format Set is comprised of modules of DL Pager formats that can be integrated with existing formats.

### Industry Leading Table Definition

The DL Pager CALS Tables Format Set takes full advantage of DL Pagers rich table definition capability, which has earned the reputation of being the industry leader in hands-free composition. The CALS Tables Format Set works with DL Pager to provide aesthetic controls far above those allowed in the CALS Tables specification, such as leading, hanging characters, leadering and B values. The format set provides additional flexibility by allowing publishers to store formatting style information, such as point sizes, gutters, lead above the table, lead offset in rows and defaults which apply column and row separators. With the CALS Tables Format Set, DL Pager can apply this information when composing CALS Tables and will automatically select the correct style definition and tab style attributes.

### CALS Table Module Features

The CALS Tables Format Set supports the following features:

- Supports the CALS standard for SGML table definition, CALS spec MIL-M-28001B Appendix A.
- Support for 'more rows' attributes, also known as vertical spans.
- Provides a set of complete DL Pager format applications for integration with existing formats.
- Expands tables beyond the limitations of the CALS standard by allowing the use of DL Pagers rich table aesthetic controls such as: leading, hanging characters, leadering, B values and more.
- Automatically generates and stores formatting style information for use by DL Pager CALS Tables Set.
- Publishers can use existing formats and maintain existing style definitions for paragraphs within tables, bulleted lists, etc.

### For More Information

For more information about how the CALS Tables and DL Pager can work in your composition environment, contact Datalogics Sales at 312.853.8200 or via e-mail at [sales@datalogics.com](mailto:sales@datalogics.com).

#### SYSTEM REQUIREMENTS
