

PRESS RELEASE

Datalogics announces the availability in Japan of additional platforms and enhancements for the Adobe PDF Library SDK through EAST Co.

Chicago, IL, April 12, 2010 — Datalogics, Incorporated, the premier source for Adobe PDF developer technology, today announced the availability in Japan of additional platforms and enhancements to the Adobe PDF Library SDK, including .NET and Java language interfaces, and other PDF SDKs, through Tokyo-based technology partner EAST Co., Ltd.

Under the terms of the agreement, EAST Co. will provide direct licensing and support services in Japan for the Adobe PDF Library SDK, Adobe Normalizer SDK, and the PDF2IMG utility as provided via Datalogics.

“We are very happy to be partnering with Datalogics,” remarked Kazuo Shimokawa, President, EAST Co. “We believe there is good potential in the Japanese market for the enhancements and additional platforms available from Datalogics, especially the .NET interface and 64-bit platforms.”

“We are extremely pleased to be working with such a competent partner,” said Kevin McNeill, President, Datalogics. “EAST’s strong technical competence in electronic document processing, expertise in Unicode and CJK fonts, and local presence make them an ideal partner. We look forward to working together.”

Availability

The Adobe PDF Library SDK, Adobe Normalizer SDK and Datalogics PDF2IMG are available for Windows, Linux, AIX, HPUX (Itanium and PA-RISC), MacOS and Solaris (Sparc and x86), in 32- and 64-bit versions. For details on pricing and availability, please contact EAST for Japan or Datalogics for all other regions.

About the Adobe PDF Library

The Adobe PDF Library SDK is a developer toolkit which allows third-party developers to support the PDF format within their own applications. Developers can build powerful Adobe PDF solutions in desktop environments and server platforms, using the same core technology with which Adobe Systems, Inc. builds its Acrobat family of products. The toolkit provides access to a broad range of functionality and full compatibility with the latest PDF specification, enabling high-performance, scalable optimized PDF processing. Included as part of the Library distribution are the Datalogics Enhancements (DLE), a set of modules that include performance improvements and optimizations, and language interfaces for .NET and Java developers.

About EAST Co. Ltd.

EAST is a Tokyo-based software developer which was founded in 1985 and has specialized in providing Windows-based solutions for a variety of business. For the past ten years, we have focused on server solutions, and now we are expanding our expertise to newly emerged client technologies including Google Android. These challenges will help us create advanced solutions requiring interaction between clients and server. EAST has also been a leading developer in Japanese language processing such as dictionary and font solutions. For more information, visit www.est.co.jp.
