PRESS RELEASE

## **Datalogics showcases the Adobe PDF Library API with .NET interface at Microsoft Tech-Ed 2009**

---

**Chicago, IL, April 27, 2009** — Datalogics, the premier source for Adobe PDF developer technologies, is showcasing the Adobe PDF Library API with .NET interface at Microsoft Tech-Ed 2009, in Los Angeles, CA. Visitors can obtain more information about the developer toolkit and the free software evaluation program for this API at the Datalogics booth #235.

The Adobe PDF Library is an SDK which allows developers to quickly add reliable, robust PDF capabilities to their applications. Powerful client- and server-based PDF solutions can be built using the same core technologies that Adobe uses to build Acrobat. As part of its PDF Library distribution, Datalogics includes the Datalogics Enhancements (DLE), a set of modules which provide performance improvements, optimizations and enhancements; and language interfaces for .NET and Java developers.

"The .NET interface has been the biggest driver for new Adobe PDF Library business since its release," states Kevin McNeill, Executive Vice President. "Providing this .NET interface as part of our distribution of the Adobe PDF Library allows software application vendors to focus on their core competencies while relying on proven, scalable, future-proof PDF technology from the source of PDF, Adobe."

### **About the Adobe PDF Library**

The Adobe PDF Library is a developer toolkit which allows third-party developers to support the PDF format within their own applications. Developers can build powerful Adobe PDF solutions in desktop environments as well as a wide range of server platforms, using the same core technology with which Adobe Systems, Inc. builds its Acrobat family of products. The toolkit provides access to a broad range of functionality and full compatibility with the latest PDF specification, enabling high-performance, scalable optimized PDF processing. Included as part of the Library distribution are the Datalogics Enhancements (DLE), a set of modules which include performance improvements and optimizations, and language interfaces for .NET and Java developers.

The Adobe PDF Library is available on a wide variety of platforms, including Windows (32- and 64-bit), MacOS, Linux, AIX, HPUX (PA-RISC and Itanium), Solaris Sparc, and Solaris x86 OS.

### **About Datalogics**

Chicago-based Datalogics, Incorporated, an Adobe Portfolio Company and a leading provider of innovative document technologies, has dedicated over 40 years to delivering the highest quality software technologies and services which meet the most demanding customer needs. Datalogics is the premier source for Adobe PDF developer technologies, including the Adobe PDF Library, Adobe Normalizer, Adobe PDF JobReady, and the Adobe PDF Print Engine.
