

PRESS RELEASE

Adobe InDesign Server now available through Datalogics

Chicago, IL, July 15, 2009 — Through a further extension of their partnership with San Jose-based Adobe Systems, Datalogics is now licensing Adobe InDesign Server to software developers and implementers. InDesign Server now joins the other Adobe technologies available through Datalogics, including the Adobe PDF Library SDK, Adobe PDF Print Engine, Adobe Normalizer, and Adobe PDF JobReady.

Adobe InDesign Server is a robust and scalable engine that offers the ability to automate the design, layout and typographical capabilities of Adobe InDesign. Rigorously tested to provide a high degree of stability, it offers a flexible development environment, including support for SOAP, Java, AppleScript, JavaScript, Microsoft Visual Basic, C#, and C++ plug-ins. The latest version also supports IDML, a new open file format that enables developers to programmatically assemble and disassemble InDesign pages using standard XML tools.

Adobe InDesign CS4 Server is available on Windows 32-bit, Windows 64-bit, and MacOS platforms; and can be licensed directly from Datalogics.

About Datalogics

Chicago-based Datalogics, Incorporated, an Adobe Portfolio Company, has dedicated over 40 years to delivering the highest quality software technologies and services which meet the most demanding customer needs. Datalogics is the premier source for Adobe PDF technologies, including the Adobe PDF Library with .NET and Java interfaces, Adobe Normalizer, Adobe PDF JobReady, and the Adobe PDF Print Engine.
