

PRESS RELEASE

Adobe PDF Library now available on Sun Solaris x86 from Datalogics

Chicago, IL, February 20, 2009 — Datalogics, Incorporated, the premier source for Adobe PDF developer technologies, today announced the immediate availability of the Adobe PDF Library for the Sun Solaris x86 platform. With this toolkit, software developers can now build native Solaris x86 applications using the same core PDF technology that Adobe uses in their Acrobat family of products.

"We are pleased to add Solaris x86 to our list of available platforms for the Adobe PDF Library," states Kevin McNeill, Executive Vice President, Datalogics. "Clearly, this combination of UNIX reliability and ready availability of Intel/x86 hardware is gaining traction. We have seen growing interest in the Solaris x86 OS, especially outside the US."

Olaf Drümmer, Managing Director at Berlin-based technology partner callas software GmbH, agrees. "Solaris x86 is indeed growing in popularity, especially in the world of SaaS and cloud computing. Applications optimized for cloud deployment, such as our pdfToolbox Server, are finding interest in the market at large. We look forward to utilizing the Adobe PDF Library SDK in our Solaris x86 applications."

The Adobe PDF Library for Solaris x86 is available directly through Datalogics.

About the Adobe PDF Library

The Adobe PDF Library is a developer toolkit which allows third-party developers to support the PDF format within their own applications. Developers can build powerful Adobe PDF solutions in desktop environments as well as a wide range of server platforms, using the same core technology with which Adobe Systems, Inc. builds its Acrobat family of products. The toolkit provides access to a broad range of functionality and full compatibility with the latest PDF specification, enabling high-performance, scalable optimized PDF processing. Included as part of the Library distribution are the Datalogics Enhancements (DLE), a set of modules which include performance improvements and optimizations, and language interfaces for .NET and Java developers.

The Adobe PDF Library is available on a wide variety of platforms, including Windows (32- and 64-bit), MacOS, Linux, AIX, HPUX (PA-RISC and Itanium), Solaris Sparc, and Solaris x86 OS.

About Datalogics

Chicago-based Datalogics, Incorporated, an Adobe Portfolio Company and a leading provider of innovative document technologies, has dedicated over 40 years to delivering the highest quality software technologies and services which meet the most demanding customer needs. Datalogics is the premier source for Adobe PDF developer technologies, including the Adobe PDF Library, Adobe Normalizer, Adobe PDF JobReady, and the Adobe PDF Print Engine.
