

READynamic™

Secure Digital Solution to Publish and Manage Content, and Measure Success

Overview

READynamic™ is a secure digital publishing, reading, and assessment solution designed for digital content providers who need to control content access, end-user permissions, and want to understand reader behavior. READynamic offers embedded multimedia curation, interactive collaboration and community building, and content evaluation opportunities - all directly within your protected content. On-demand page level participation data delivers valuable insights into consumer reading patterns for real-time publication enhancement. As a cross-platform PDF and EPUB reading solution, content within READynamic is available anywhere and anytime online, and extends offline with Android and iOS applications. READynamic can also be custom branded for your organization.

Organizations can deploy READynamic quickly and seamlessly without additional development costs, and deliver secure content to the right audience at the right time with customizable access, permission controls, and Digital Rights Management (DRM). Trainers, educators, learners, and end-users can focus learning with text highlights, bookmarks, and other interactive overlays while discussing and collaborating with in-content commenting. Reading progress can be assessed with real-time Caliper Analytics page view tracking. READynamic also validates learning and comprehension with customizable assessments that are flexible to manage and simple to create.

With READynamic, users can:

- Foster stronger community collaboration, discussions, and interactions
- Deliver proprietary and purchased content to authenticated users only
- Prevent unauthorized sharing, printing, copying, saving, and downloading
- Curate immersive multimedia experiences
- Provide on-demand analytics
- Easily brand for new promotional opportunities

Specifications

Operating System - Linux Ubuntu 64 bit 16.04 with Kernel 3.10.

Memory - 12 GB recommended 8 GB required.

Processor - Intel Core i7 (2.66 Ghz) recommended. Minimum 4 cores.

Disk Space - Two 2 TB drives with RAID 1 reserve drive recommended. Minimum 100GB space available.

Bandwidth - 100 Mbit/second port and unlimited traffic volume. Port 80 must be available. Apache must NOT be running on host.

Access Rights - The user deploying the READynamic server platform must have Sudo access.

IMS Global® LTI-Certified Digital Solution - Allowing for immediate integration into the most popular learning management systems (LMS) available.

Licensing and Support

Technical support and regular updates are provided via our Support and Maintenance program – this enables you to keep your application current and compatible with the latest versions of READynamic as they are released.

With over fifty years of experience in the document market, Datalogics has continually adapted to the ever-changing technology world, but one thing remains consistent – we are deeply committed to supporting our customers and staying technically-focused to offer the best possible products and services. A dedicated Technical Support Engineer will provide you with support during both the evaluation phase and as a customer. Our software is continually improved with regular updates and we provide timely technical service bulletins with detailed changelog documentation. We also provide code samples, documentation, and answers to frequently asked customer questions on our development site and in our knowledge base.
